

Varn® Versi

The Universal Fountain Solution

Fountain Solution

Versi is our highly versatile fountain solution concentrate designed for use on presses equipped with conventional, integrated or Kompac® Automatic Dampening Systems. Versi is compatible with all types of paper stock and with most oil based and rubber based inks. It is specially formulated for maximum stability in all water conditions, and there is no longer a reason to change fountain solutions when changing from metal to black or silver masters. Versi does it all!

Advantages of Varn® Versi

- Outstanding latitude
- Effective with black, silver and metal plates
- Compatible with all ink types
- Consolidates fountain solution inventories

Directions

Versi fountain solution is designed for use on small presses equipped with conventional, integrated, or Kompac Dampening Systems. It will give excellent results on metal, camera, photodirect and paper masters. Works well with all rubber based and oil inks.

Suggested mixing ratios for commonly used metal, photodirect and paper masters:

- For **KOMPAC or CONVENTIONAL DAMPENING SYSTEMS**: Use 15 parts water to 1 part Versi (2 ounces per quart).
- For **INTEGRATED DAMPENING SYSTEMS**: Use 7 parts water to 1 part Versi (4 ounces per quart). Add alcohol as needed.

We recommend a regular professional maintenance program with special emphasis on washup of rollers and blankets.

Packaging

U.S.A.
 12 x 1 Quarts
 4 x 1 Gallons
