Varn® Super-Lene

An All-purpose Small-press Fountain Solution

Fountain Solution

Super-Lene desensitizes the nonprint area and keeps it clean without gray backgrounds. Printers can now have big press results over long runs using a wide variety of plates – often without adjusting the fountain solution.

Advantages of Varn® Super-Lene

- Compatible with all plates
- Effective with all types of inks
- Glycerin based
- No pH or conductivity concern
- Mix to performance

Directions

Super-Lene can be run with metal plates, paper masters, presensitized plates and all types of grained plates. It will perform exceptionally well on all rubber based and oil based inks.

Presensitized and additive metal plates, camera, and photo-direct plates: From 7 up to 15 parts water to 1 part Super-Lene.

Paper masters, direct image and diffusion transfer plates: From 7 up to 25 parts water to 1 part Super-Lene.

Use full strength as a pre-wetting agent on paper masters. Flint Group recommends a regular professional maintenance program with special emphasis on washup of rollers, blankets and molletons to remove glaze and assure maximum print quality.

Packaging

U.S.A.
12 x 1 Quarts
4 x 1 Gallons
30 Gallon Drum
